

Cubo rooflights are proven specialists in the design, manufacturing and installation of all rooflight types. We are unique in that we can offer our customers the choice of contemporary flat aluminium rooflights, or hand-crafted timber roof lanterns and orangeries.

Timber Roof lanterns/Orangeries

Our unique designs incorporate the best of the old styles with new high performance double and triple glazing, achieving U values as low as 0.5 W/m²K, which ensures a more ambient temperature for all seasons. No external timbers are exposed, delivering longevity in our Irish climate. You can also choose our hand-rolled lead cappings to complement any building project.

Flat Rooflights

Flat rooflights are now a popular addition to most contemporary building projects. In response to this demand, we have developed our own flat rooflight system with cubo patented extrusions.

Clean sharp lines, large glass panes, powder coated finish and drained cavity, coupled with a system that is flexible in its design applications, ensures we at cubo can produce almost any rooflight concept that you may conceive.
